GHAZANFAR ALI

SENIOR GAME DEVELOPER | UNITY & C# | MOBILE, WEBGL & MULTIPLAYER

Lahore, Pakistan • +92 344 4413192 • mailtoghazanfar@gmail.com

ghazanfargamedev.github.io • linkedin.com/in/ghazanfar-ali-726873100

PROFESSIONAL SUMMARY

Senior Unity game developer with 7+ years of experience delivering 2D/3D games and interactive applications across Android, iOS, PC and WebGL. Background in gameplay architecture, vehicle physics, real-time multiplayer, AI, performance optimization and production delivery. Experienced in monetization systems and browser-based playable ad development using PlayWorks/Luna.

CORE SKILLS

Gameplay programming & systems design • Vehicle controllers & physics • AI, navigation & NPC behavior • Multiplayer networking • UI/HUD implementation • Mobile game monetization • Playable ad development • Cross-platform development • WebGL performance & memory optimization • Profiling & debugging • REST API integration • Technical leadership & code reviews

TOOLS & TECHNOLOGIES

Game engines & languages: Unity, C#, Unreal Engine, JavaScript, Three.js

Playable & monetization: PlayWorks / Luna, Google AdMob, AppLovin MAX, Unity IAP, Google UMP, ByteBrew, Solar Engine

Backend & multiplayer: Firebase, PlayFab, Photon Fusion 2, Mirror, Socket.io, Node.js, Sequelize, REST APIs, JSON, OAuth / SSO, MySQL

Development & delivery: Git, GitHub, Bitbucket, Docker, Amazon S3, Unity Profiler, Addressables, Android SDK, WebGL

PROFESSIONAL EXPERIENCE

Senior Game Developer — GamEmpires | ***Apr 2026 – Present***

Unity game development with a focus on mobile production, gameplay systems, platform delivery and playable-ad workflows.

Senior Software Engineer — Meraki Metrix (innov8.jp) | ***Sep 2024 – Jan 2026***

Developed and optimized Unity applications for WebGL and mobile, built secure authentication flows and low-latency multiplayer features with Photon Fusion 2; contributed to a Deloitte Japan project.

Senior Software Engineer — CLV Technologies / Salvay | ***Jul 2022 – Jul 2024***

Built Unity mobile and WebGL experiences, integrated Mirror multiplayer and WebGL authentication, and worked across engineering, design and product teams.

Team Lead — Fog Revolution | ***Apr 2022 – Jul 2022***

Led gameplay development, code reviews, mentoring and production troubleshooting.

Senior Game Developer — Clash of DVLoper | ***May 2021 – Mar 2022***

Implemented maintainable gameplay features and resolved production issues with cross-functional teams.

Game Developer — Fog Revolution | ***Jun 2018 – Jan 2021***

Developed and maintained game applications, supported testing and contributed to timely releases.

Game Developer — ICAW Pvt Ltd | ***Jun 2017 – Jan 2018***

Developed mobile game applications and supported QA, reviews and final build delivery.

SELECTED PROJECTS

Deloitte Metaverse | Unity • WebGL • Photon Fusion • REST APIs |

Browser-based multiplayer office and meeting simulation for Deloitte Japan, including networked interactions, backend integration and in-project video streaming.

Gnome Wars | Unity • Mirror • WebGL • REST APIs |

Multiplayer shooter with playable and AI gnomes, game modes and backend-connected features.

Phonic Zoom | Unity 2D • Educational Games • REST APIs |

Educational learning application with 30+ phonics and spelling games, teacher-managed content and student result features.

Mobile Driving & Sports Games | Unity • Android / iOS |

Portfolio includes City Car Drifting Driving Game, US Real Drift Driving Car Game, US Bike Driving Wheelie Games, Soccer & Football Games 2026 and Head to Ball: Soccer Games.

PlayWorks / Luna Playable Ads | Unity • WebGL • JavaScript pipeline |

Developed lightweight interactive ad experiences involving vehicle selection, city driving, parking, drifting, traffic and football gameplay, with responsive portrait/landscape UI and optimization for browser delivery.

Other Games & Prototypes |

DemoFPS Game Prototype, Forest Survival Hunting, Survival Forest Island, Target Sniper 3D III FPS Game, Alien Attack Space Shooter and Stickman Thief Simulator.

ADDITIONAL PRODUCTION EXPERIENCE

- Implemented mobile ad formats including banners, interstitials, rewarded ads, MREC and app-open ads, with mediation and in-app purchases.
- Built configurable vehicle controls, game progression systems, save/load flows, daily rewards, tutorials and UI for mobile titles.
- Optimized WebGL playable builds for bundle size, runtime memory, supported APIs, physics cost and mobile-browser responsiveness.

EDUCATION

BS Software Engineering | Lahore Garrison University (LGU), Pakistan | 2012–2016

Capstone: 3D Unity first-person shooter and sniper game featuring weapon switching and physics-based mechanics.
